

GARY R. WHITMAN, B.S.M.E. PROFESSIONAL BIOGRAPHICAL OUTLINE

BACKGROUND

Mr. Whitman earned his BS in Mechanical Engineering and attended graduate courses in Medical Science at Drexel University. Currently, Mr. Whitman's focus is research, test, design, and development of occupant crash safety systems. He has collaborated with the National Highway Traffic Safety Administration, the American Academy of Pediatric Child Injury Prevention, National SAFE KIDS Campaign, the Children's Hospital of Philadelphia in child restraint research and investigation projects. Because of his dedication and special contributions, he was honored with the 1997 Pennsylvania Governor's Highway Safety Award for Occupant Protection. Mr. Whitman was the technical lead on several programs to develop an advanced occupant crash protection systems for Army ground vehicles and a program with NIOSH to study occupant crash protection of ambulance occupants. Mr. Whitman was the Subject Matter Expert on another Army program to improve the occupant crash protection in the HMMWV ground vehicle.

He has spent his entire career in the fields of occupant crash protection, restraint systems, emergency escape, crash safety and survival, system safety, and life support engineering. Mr. Whitman has over 30 years of experience in the investigation of automotive and aircraft mishaps, and provides expert testimony in his specialty fields. He is co-inventor of a passenger vehicle safety seat system; another patent for a vehicle occupant crash protection system is pending.

- Child Restraint Specialist
- Human Subject Crash Testing
- Air and Vehicle Safety Analysis
- Crash Investigation and Analysis
- Life Support Engineering
- Occupant Kinematics
- Injury Mechanism Analysis
- Crash Survivability Research
- Occupant Restraint Systems Design & Testing
- Safety Product Design and Development

SUMMARY OF EXPERIENCE

- Directed special technical programs, including a NHTSA study of the biofidelity of state-of-the-art child dummies
- Directed a project to develop a technically advanced occupant crash protection system for ARMY ground vehicles
- Conducted numerous simulated crash sled test programs assessing child occupant crash protection systems
- Conducted hundreds of investigations of crashes involving child occupants
- Lead the development of an advanced blast and crash occupant crash protection seating and restraint system for Army ground vehicle occupants
- Developed, tested and evaluated safety equipment for Navy aviators
- Led a technical engineering team in the development of advanced restraint concepts for high performance aircraft
- Developed a new approach for seat integrated restraints, which resulted in development of state-of-the-art occupant restraints

- Spearheaded the design and development of a night vision goggle detachment system for prevention of serious cervical spine injury to ejecting aircrewmembers
- Led a team of Navy specialists in assessing, testing and analyzing crash and escape systems
- Selected as Program Manager for a number of projects in the fields of safety restraint systems, occupant crash protection, crash safety and survival, emergency escape, and life-support engineering

EDUCATION

- B.S.M.E., Mechanical Engineering, Drexel University, 1979
- Graduate Studies, Medical Science I, II, & III, Drexel University
- Anatomy and Physiology I & II, Bucks County Community College
- Certified Child Passenger Safety Technician 2002-Current

PROFESSIONAL EXPERIENCE

October 1993 – Present | ARCCA, Incorporated | Director of Crashworthiness

- Leads ARCCA Crashworthiness Group in research, development and investigation in the field of occupant crash protection
- Lead ARCCA Research and Development Group in projects aimed at improving occupant protection for both adults and children
- Investigates automotive and aircraft mishaps
- Acted as Lead Engineer in a National Highway Traffic Safety Administration research program to study the biofidelity of state-of-the-art child dummies
- Served as principal investigator for an Army-sponsored projects to improve occupant crash and blast protection in Army ground vehicles
- Served as principal investigator on a NIOSH program on the test and evaluation of ambulance patient compartment occupant crash protection

January 1978 – October 1993 | Naval Air Warfare Center | Senior Engineer

- Coordinated programs such as the Survival Technology and Restraint Improvement Program (STRIP) and the CATEYES Emergency Detachment System (CEEDS)
- Oversaw mission analysis, requirements, development specifications, requirements allocation, design, integration, testing, evaluation, and engineering specialties
- Developed life support equipment for ejected aircrew of several Navy aircraft
- Led a team that established requirements, tested and evaluated restraint and life support systems developed for Navy Aircrew Common Ejection System (NACES) to ensure proper crew station integration
- Led a team of Navy specialists to design, assess, analyze and test candidate occupant restraints
- Performed as project engineer in programs to improve crew protective equipment and survivability
- Executed design, testing and evaluation on projects such as: the Encapsulating Life Raft; the TACAIR Anti-Exposure System; the Patrol Aircrew Anti-Exposure System; and the Survival Stowage Backpack for the Maximum Performance Ejection
- Lead the preparation of the Technical Data Indoctrination Packages (TDIP) and manuals for several of the above programs, which were the first TDIP's prepared for crew system equipment

PROFESSIONAL AFFILIATIONS

- Society of Automotive Engineers
- The SAFE Association

PATENTS

- Co-inventor of Seat-Mounted Occupant Crash Protection System, U.S. Patent No. 6,155,601, December 5, 2000
- Co-inventor of Vehicle Safety Seat System in Passenger Vehicles, USSN 08/339,859 Vehicle Safety Seat System, Patent No. 5,553,924, September 1996
- Actuation System for an Encapsulating Life Raft, U.S. Patent No. 4861298, August 29, 1989
- Occupant, Reach and Mobility Apparatus, 5,490,517, February 13, 1996
- Co-inventor of Dual Stage Variable Load Energy Absorber for Vehicle Seating, U.S. Patent No. 8,162,374B2, April 24, 2012
- Co-inventor of Dual Stage Variable Load Energy Absorber for Vehicle Seating, U.S. Patent No. 8,439,420B2, May 14, 2013.

AWARDS AND RECOGNITIONS

- Safe Kids 2014 Child Passenger Safety Award
- Safe Kids 2010 Champion Award
- SAE Technical Paper "Crash Protection for Infants Transported in Incubators" judged to be among "Most Outstanding of 2009"
- SAE Technical Paper "Crash Testing of Ambulance Chassis Cab Vehicles" judged to be among "Most Outstanding of 2007"
- SAE Technical Paper "Effect of Cognitive Workload on Automatic Restraint System Usage" judged to be among "Most Outstanding of 2000"

- SAE International Recognition Award, Professional Development Program, Research Program to Increase the Safety and Crashworthiness of Military and Commercial Ambulances, September 12, 2001
- Governor's Highway Safety Award - Occupant Restraint Programs, October 1997
- Award for Glove/Mitten Assembly, January 1987
- Invention Awards for Actuation System for an Encapsulating Life Raft, December 1989, June 1986
- Superior Performance Awards for the years 1988 through 1993

PRESENTATIONS

- September 30, 2014** *The Principles of Occupant Crash Protection and How They Apply to Child Passenger Safety* presented for the PA Chapter of the American Academy of Pediatrics
- September 2013** *What Ensures that U.S. Child Passenger Crash Protection is State-Of-The-Art?* 2013 The Safety Institute Conference
- April 2006** *Dolly Rollover Testing of Child Safety Seats* presented at SAE World Congress
- September 2002** *Lateral Restraint for Children* presented at SAFE Association's 40th Annual Symposium
- September 22 – 23, 2003** *Occupant Kinematics with Child Safety Seats Tested Under Real World Conditions*, presented at the 47th Annual Proceedings of the Association for the Advancement of Automotive Medicine, Lisbon, Portugal
- September 12, 2001** *Research Program to Increase the Safety and Crashworthiness of Military and Commercial Ambulances*, SAE International, Military and Emergency Vehicles Safety TOPTec, Tempe AZ
- December 2000** *New Occupant Protection Technology and Its Effect on Children*, presented at 2000 Transportation Engineering And Safety Conference, Penn State University, University Park, PA
