

FORENSIC MEDICAL ILLUSTRATOR (Penns Park, PA)

JOB DESCRIPTION

POSITION DESCRIPTION

ARCCA's Medical Illustrator role is tailored for those who love 3D visuals and are intrigued by the fascinating field of Forensic Science. The only two qualities we care more about than passion is an obsessive attention to detail and a hunger to execute the truth. We are seeking a full-time Forensic Animator to create three-dimensional medical visuals and graphics for one of the nation's leaders in Forensic Engineering. Science should not intimidate you – it will be the heart and foundation of the technically-accurate 3D visuals you create. You will work hand-in-hand with engineers and scientists to create world-class 3D medical animations that will be used in courtrooms throughout the country. You will learn how to obtain and utilize 3D laser scan data and how to operate and utilize drone technology. This position is designed for someone who gets excited about learning something brand new every week, is not intimidated by large-scale scientific projects, and wants to push the professional envelope as much as they want to push themselves. A long-term desire to grow and manage a creative, industry-leading group through presenting and promoting your work will set you apart from the field. We seek innovators who seek challenges. Training for forensic-specific applications will be provided. The ideal candidate would have a background in engineering or physics.

REQUIREMENTS

- Bachelor's degree in computer animation, graphic arts, engineering, or a similar field (4-year degree required);
- Proficiency with AutoCAD/Maya (or other similar software) preferred;
- Familiarity with 3DS Max software, preferred;
- Experience in compositing/post-production (Photoshop, After Effects, Premiere, or similar) preferred;
- An understanding (or aptitude) to learn physics and math (you cannot be intimidated by science);
- An engineering background is preferred (just be ready to learn / apply science daily);
- 2+ years professional work experience in a similar role (preferred, but not required);
- A laser-like attention to detail;
- Ability to provide a high level of client service in a demanding, deadline-driven working environment;
- Ability to work independently in a fast-paced company.

HOW TO APPLY

Please submit your resume and demo reel to Christie Voelker, Human Resources Director, at jobs@arcca.com.
