

BACKGROUND

Dr. Kefala earned a Bachelor of Science degree in Physics and a Master of Science degree in Medical Physics from the University of Patras in Greece. She continued her studies with a second Master of Engineering degree in Biomechanics, and a Ph.D. degree in Biomechanics from the University of Denver.

Dr. Kefala has over eight years of experience in a dynamic research environment dedicated to advancing orthopaedic biomechanics, biomechanics laboratory testing, verification and validation techniques and three years of clinical experience as a medical physics assistant with solid background in engineering, science, and physics gained through research and coursework. She is skilled in performing data acquisition, analysis, and has published several studies to facilitate research into diverse topics. She is familiar with documentation requirements and bringing an organized and precision-minded approach to our Human Factors/Biomechanics group.

Dr. Kefala has completed research projects in accurately measuring joint kinematics during activities of daily living for informing diagnosis, helping design of treatments, and improving the design of prosthetic devices. The end-result of her Ph.D. research was to obtain healthy data from the hip and knee joint during different activities of daily living based on laboratory testing on human subjects with a dual fluoroscopy system that was synchronized with a motion capture system. The collected data was used as a reference for comparing the effectiveness of different prosthetic devices, and by accessing data that support computer models. The results, obtained from Dr. Kefala's research work have been published in well established and high impact factor journals.

AREAS OF EXPERTISE

- Human Kinematic Analysis and testing
- Joint Biomechanics
- Injury Causation Biomechanics
- Human Injury Mechanisms
- Building Codes and Standards
- Gait Analysis
- Human Factors
- Human Injury Tolerance Thresholds

EDUCATION

- Ph.D., Biomechanics, University of Denver, CO, 2021
 - *Dissertation: "Accurate Measurement of Healthy Joint Kinematics to Inform Diagnosis and Treatment"*
- Master of Engineering, Biomechanics, University of Denver, CO, 2015
 - *Thesis: "Assessment of Normal Knee Kinematics using High-Speed Stereo-Radiography System"*
- Master of Science, Physics, University of Patras, Greece, 2009
 - *Thesis: "Radiobiological models-based evaluation of the consequences of potential systematic catheter shifts in the HDR brachytherapy of prostate cancer"*
- Bachelor of Science, Physics, University of Patras, Greece, 2007
 - *Thesis: "Dose and Radiobiological Danger during Mammography"*

PROFESSIONAL EXPERIENCE

February 2022 – Present | ARCCA, Incorporated | Senior Biomechanist

- Applies the principles of human factors and biomechanics to the anatomy and physiology of the human body to explore the cause, nature, and severity of injuries.
- Performs analysis of building codes associated with personal injuries and premises liability Building Codes and Standards.
- Provides instruction in the area of human factors, and biomechanical and injury causation analysis.

January 2013 – March 2021 | University of Denver | Research Assistant

- 8 years of experience in biomechanics laboratory testing on human subjects.
- Implemented and applied concepts on dual plane fluoroscopy system, 3-D motion capture and EMG for in vivo accurate joint kinematic measurements.
- Developed test methods in support of dual plane fluoroscopy hardware system for system level calibration and validation.
- Collected research data to create representative graphs and charts highlighting results for presentations.
- Performed statistical, qualitative, and quantitative analyses.

August 2009 – March 2011 | Klinikum Offenbach & University of Patras, Offenbach (Germany) & Patras (Greece) | Medical Physics Assistant-Trainee

- Part of commissioning and basic dosimetry after installation of linear accelerators.
- Worked on external radiation treatment planning and brachytherapy treatment planning.
- Part of clinical and quality control procedures for CT scanner.
- Attended training courses to build understanding of processes, techniques, and industry.

ACCOMPLISHMENTS

- Developed a calibration methodology for a dual plane fluoroscopy system.
- Part of the validation and application of a dual plane fluoroscopy system.
- Implemented and applied concepts on dual plane fluoroscopy system and 3-D motion capture system for measure in vivo knee and hip joint kinematics with a high degree of accuracy, during activities of daily living for informing diagnosis and helping design of treatments.
