

RONALD J. FIJALKOWSKI, Ph.D. PROFESSIONAL BIOGRAPHICAL OUTLINE

BACKGROUND

Dr. Fijalkowski received a Bachelor of Science in Biomedical Engineering from the Milwaukee School of Engineering and went on to obtain his Ph.D. in Biomedical Engineering from Marquette University while involved in a joint program with the Medical College of Wisconsin. His scientific research has focused on trauma biomechanics with test programs involving human volunteers, post-mortem human subjects, live-surrogates, and anthropomorphic test devices, as well as full scale automotive crash tests and sled tests.

Dr. Fijalkowski has also designed and implemented original research involving experimental and computational models focused on human injury mechanisms, tolerance thresholds, pathological outcomes, and behavioral deficits. He specializes in the study of human kinematics and kinetics during injurious scenarios. This background has provided an intricate knowledge of human anatomy and physiology in the context of biomedical principles and physics that is applicable to a wide range of environments.

SPECIALTIES

- Injury Causation Biomechanics
- Brain Injury Biomechanics
- Spinal Biomechanics
- Sports Biomechanics
- Human Injury Mechanisms
- Human Tolerance Thresholds
- Vehicular Accident Reconstruction
- Diffuse Brain Injury

EDUCATION

- September 1999 to May 2003: Bachelor of Science (B.S.) in Biomedical Engineering from the Milwaukee School of Engineering, Milwaukee, Wisconsin.
- September 2003 to May 2008: Doctorate of Philosophy (Ph.D.) in Biomedical Engineering from Marquette University, Milwaukee, Wisconsin.

PROFESSIONAL EXPERIENCE

ARCCA, LLC | Director of Biomechanics & Human Factors – East Coast, V.P., Senior Biomechanist

- Conducted in-game National Hockey League (NHL) player evaluations to measure torso accelerations during body-to-body and body-to-board checking events. These data were used to assess individual biomechanical performance and effectiveness of protective equipment.
- Investigated the design and performance of NHL protective equipment such as gloves, shoulder pads, and skate guards
- Performed real-world dynamic impact testing of various professional baseball, football, and hockey helmet designs to investigate the kinematic and kinetic response.
- Scientifically evaluated the performance of hockey boarding systems to develop and implement a new design focused on trauma mitigation.
- Performed dynamic underbody blast testing in the military environment to design and implement a new seating and restraint system for ground vehicles
- Assessed the response of the human body and various injury mechanisms during automotive collisions through full-scale sled testing involving anthropomorphic test devices (ATDs).
- Evaluated forensic evidence associated with impact or inertial loading conditions induced during incidents such as motor vehicle collisions, slips, trips, or falls.

Epic Sports Biomechanics, LLC. | Director of Sports Biomechanics

- Designed and implemented physical skill assessment protocols focused on identifying movement quality, power, flexibility, mobility, and overall athleticism.
- Planned and executed biomechanical investigations targeting all aspects of the body to evaluate the athlete's risk of injury.
- Established novel scientific testing protocols utilizing advanced biomechanical technologies such as motion capture, inertial measurement units, high-speed cameras, and pressure mats, to evaluate individualized skill-specific performance.
- Analyzed the unique biomechanical data (i.e. kinematics and kinetics) associated with all athletes to evaluate their risk of injury and athletic deficiencies to streamline long-term athletic development.
- Created and carried out training programs that mitigated the risk of injury and focused on improving athletic performance.

Medical College of Wisconsin | Engineering Technician / Researcher

- Applied biomedical engineering principles to investigate real-world injury scenarios and evaluated injury causation, injury tolerance, and protective measures.
- Designed and implemented novel experimental and computational models to evaluate the propensity for human neurological injury in the automotive environment.
- Developed more robust brain injury tolerance thresholds and injury metrics in the context of new experimental data and retrospective analyses.
- Performed human spinal column investigations to explore the soft tissue response to crash forces and cyclic loading conditions in the presence of degeneration and surgical intervention.
- Performed post-mortem human surrogate experimentation to evaluate spinal injury mechanisms, tolerance thresholds, and injury metrics in dynamic loading environments.
- Evaluated motor vehicle crash forces, accelerations, and changes in velocity in various test programs including frontal barrier impact tests, moving barrier side impact tests, low speed vehicle collisions, and sled tests.

MEMBERSHIPS IN PROFESSIONAL SOCIETIES

2004 – Present American Society of Mechanical Engineers

2008 – Present Society of Automotive Engineers

2012 – Present Biomedical Engineering Society

2016 – Present International Society of Biomechanics in Sports

APPOINTMENTS AND COMMITTEES

2011 – Present Journal of Neurotrauma Reviewer

2013 – Present Industry Affairs Committee of the Biomedical Engineering Society

FUNDED RESEARCH PROJECTS

- 2009 – 2013 *Dual Stage Variable Energy Absorber for Military Ground Vehicles*, Co-Investigator
Funding Agency: Department of Defense (DoD) – Army Research Laboratories Weapons and Materials Directorate
- 2011 – 2013 *Biomedical Engineering Analysis of Player Safety and Rink Design*, Co-Investigator
Funding Agency: National Hockey League (NHL)
- 2013 – 2015 *Player Shoulder Pad Performance and Design*, Co-Investigator
Funding Agency: National Hockey League (NHL)
- 2015 *Impact Biomechanics*, Co-Investigator
Funding Agency: Major League Baseball
- 2016 - Present *Sports Helmet Performance and Design*, Co-Investigator
Funding Agency: TBA
- 2016 – Present *Protective Equipment Dynamic Performance*, Co-Investigator
Funding Agency: National Hockey League (NHL)

PUBLICATIONS

Doctoral Dissertation
