

BACKGROUND

Dr. Jewell received a Bachelor of Science in Kinesiology from the University of Massachusetts Amherst. He went on to obtain a Master of Science degree, as well as his Ph.D., in Kinesiology from the University of Massachusetts Amherst. His scientific research has focused on studying the biomechanics behind human movement, sport performance, and injury mechanisms and causation. Dr. Jewell's graduate study focused on gait mechanics and the influence of muscle activity on the forces experienced throughout locomotion, especially in regards to chronic and acute knee injury. His research included 3-D motion analysis, electromyography, computational modeling, optimization, higher-dimensional analyses, metabolic testing, clinical and athlete testing, mechanical testing and musculoskeletal modeling. Dr. Jewell has completed advanced coursework in the fields of biomechanics, physics, engineering, dynamical systems, mathematics, anatomy, and exercise physiology.

Dr. Jewell has specialized in several research areas focused on studying all facets of human movement, injury, and performance, in addition to human factors and code compliance. He has used anthropometric test devices to quantify internal loading conditions resulting from both automotive and non-automotive scenarios. Dr. Jewell has participated in numerous engineering test programs at ARCCA, LLC focused on how different automobile crash dynamics and occupant positions affect occupant responses, including tests to evaluate the response of motor vehicle components to a variety of loading conditions. Dr. Jewell has also conducted inspections of vehicles, roadways, stairs, and both residential and commercial environments in relation to accident reconstruction, injury biomechanics, and premise liability, in addition to assessing applicable code compliance. Currently, he specializes in biomechanics, injury mechanisms and causation, accident reconstruction, kinematics and kinetics, human factors, and slip/trip/fall analysis. Additionally, he conducts product-based analysis for the design and implementation of sport protective equipment.

SUMMARY OF EXPERIENCE

- Performed scientific investigations to evaluate the effects of footwear and knee bracing on walking and running mechanics in human volunteers
- Designed and performed experimental protocols to evaluate the influence of chronic and acute injury on movement and muscle activation patterns
- Adapted and applied higher order analysis methods to explore functional movement strategies in injured runners
- Conducted performance evaluations of Division 1 and professional athletes to both improve performance and assess injury risk
- Conducted impact and material testing to evaluate the mechanical performance of differing footwear types
- Performs accident reconstruction and evaluates automotive incident severity using several peer-reviewed and accepted methods
- Performs engineering test programs to evaluate the kinematic and kinetic responses of the human body when exposed to a variety of external loading conditions
- Investigates residential, commercial, and public premises in regards to slip/trip/fall and workplace accidents based on human factors, biomechanics, and code compliance

- Conducts testing on protective sports equipment to evaluate design, performance, and risk of injury

AREAS OF SPECIALTY

- Injury Causation Biomechanics
- Slip/Trip/Fall Kinematics and Kinetics
- Illumination Analysis and Testing
- Impact Biomechanics
- Human Kinematics and Kinetics Analysis and Testing
- Injury Mechanism Analysis
- Accident Reconstruction
- Code Compliance
- Sport Biomechanics
- Human Factors

EDUCATION

- Ph.D. in Kinesiology, University of Massachusetts, Amherst, MA, 2018
 - Dissertation: "The influence of patellofemoral pain on muscle coordination and segment coordination variability in runners"
- M.Sci. in Kinesiology, University of Massachusetts, Amherst, MA, 2014
 - Thesis: "Do footfall patterns in forefoot runners change over a prolonged run?"
- B.S. in Kinesiology, of Massachusetts, Amherst, MA, 2011
 - Honors Thesis: "Rearfoot and forefoot segment coupling during the stance phase of running"

PROFESSIONAL EXPERIENCE

September 2018 – Present | ARCCA, LLC | Senior Biomechanist

- Performs injury causation analysis using knowledge of anatomy, physics, engineering, and biomechanical principles
- Specializes in crash injury analysis, injury mechanism determination, and crash kinematics
- Explores the relationship between accident kinematics and severity and human response.
- Uses and performs research involving human volunteers and anthropometric test devices to understand human responses to an event, injury mechanisms, and human tolerance.
- Conducts vehicle and site inspections
- Performs analysis of building and safety codes associated to personal injuries and premise liability
- Performs sport and safety equipment testing and analysis.

2012 – August 2018 | University of Massachusetts | Biomechanics Research Assistant

- Supervisors: Joseph Hamill, Ph.D. & Katherine A. Boyer, Ph.D.
- Lead graduate researcher in charge of subject recruitment, data collection and analyses for comprehensive gait research with Brooks Running Company and Bayer, Inc. Wrote and presented technical reports on footwear research outcomes to Brooks staff and research on knee orthoses for Bayer, Inc.
- Contributed to lab research involving acute pain flares in individuals with osteoarthritis.

- Had ongoing roles in research with Cole Haan, LLC, and The Acushnet Company including mechanical shoe testing (impact, flex, torsion, heat) and in-shoe pressure measurement.

2009 – 2011 | University of Massachusetts | Undergraduate Biomechanics Research Assistant

- Supervisor: Joseph Hamill, Ph.D.

2010 | Baystate Medical Center | Summer Student Scholar

- Supervisor: Joseph Hamill Ph.D., Steven Malin, Ph.D., & Aryn Breveleri
- Paid, collaborative research internship for rising seniors and first year medical students

TEACHING EXPERIENCE

Lead Instructor

- Undergraduate Biomechanics (KIN430) 2014

Teaching Assistant

- **Biomechanics (Kin430)**, Supervisor: Brian Umberger, Ph.D., 2011, 2017-Present
- **Anatomy & Physiology II (KIN272)**, Supervisor: Jennifer Gordon, Ph.D., 2015-2016
- **Introduction to Kinesiology (KIN100)**, Supervisor: Gary Kamen, Ph.D., 2014-2015
- **Head Teaching Assistant for Introduction to Kinesiology (Kin100)**, Supervisor: Gary Kamen, Ph.D., 2011-2013

SCHOLARSHIPS & AWARDS

- School of Public Health and Health Sciences Dean's Summer PhD Fellowship - \$7,000, 2018
- Department of Kinesiology Graduate Travel Award - \$500, 2018
- De Luca Foundation Scholarship - \$13,154, 2018
- ISBS Student Travel Grant - €200, 2017
- ISBS New Investigator Award Finalist, 2017
- UMass Graduate School Dissertation Research Grant - \$1000, 2016
- Department of Kinesiology Graduate Travel Award - \$325, 2015
- NEACSM President's Cup Doctoral Finalist, 2015
- Research Poster Competition: First Place, 18th Annual School of Public Health Research Day, 2015
- Commonwealth College Honors Scholarship, 2007-2011
- Eight Time Dean's List Member, 2007-2011
- 400 Club Member: Athletes with 4.0 GPA, 2008-2010
- Baystate Summer Student Scholar, 2010
